Student Life

Been There, Done That

" After all is said and done, life at Maryland is never dull. Whether studying on the mall or tabling an event, there is always something going on."

MUPPETS

Early last winter, the December graduates got a special send off at their commencement exercises. The Muppets were special guests at graduation and stuck around in the Student Union for an exhibit which ran through February and March. The exhibit was a tribute to the life and career of Jim Henson, the creator of the Muppets and a Maryland alum. Graduated in 1960, Henson's success invokes a sense of pride in the University which is why he was honored in this exhibit. Henson created Kermit the Frog while a student here, so Kermie took centerstage at the graduation address and the exhibit.

FUNTIMES

I SPIN YOU

Art Attack

Art and music are often common grounds for a diverse group of people to stand on. Last spring's Art Attack, an evening event on McKeldon Mall, featured musical talent from all walks of life. Run DMC provided a terrific performance for fans of popular R&B and rap music, while G Love and the Special Sauce appeased the ears of those who enjoy a slower-paced, funky melody. Arranged by the sisters of Alpha Delta Pi, the Art Attack provided entertainment for students all over campus. The croowds of people camped out on McKeldin Mall showed the University of Maryland how musci and art can bring people together.

The Route

The main drag through College Park has undergone many changes this year. In addition to the bigger and better CVS and seemingly never-ending road work, a long time tradition was brought to an abrupt end. The Rendezvous, affectionately known as the Vous, was shut down in early 1997. In its place, the owners opened up with a completely new look for the fall semester. With glass brick and and open-air decor, the new Cornerstone Grill offers live music and the feeling of an old-fashioned pub. The Cornerstone is a welcome and refreshing addition to the life on Route 1, so much so that it was rated one of the top-ten bars in the area. No matter your size or your style, Route one has something for you!

Tailgating

Every year, the crisp fall air, the bright leaves lining the horizon, and the recently re-done Byrd Stadium all singlew one thing: it's football season, and it's time to party!

The Homecoming tailgate parties are famous as one of the best events of the year. Peoplecome from miles around, across states and even across the country just to visit one more time. Students get to feel apart of the University of Maryland community, and maybe feel a little more at home in such a big university. Football games wouldn't be the same without tailgating partiesdecorating the campus. Drinking is a big part of the event, but it is not the whole picture. Many alumni are excited to return to campus,win or lose.

Homecoming and tailgate parties aren't just for alumni. Each year, new students become acquianted with the rituals surrounding Homecoming and get to feel as if they are part of the whole in such a large school.

Rain or shine, win or lose, a football game, a tailgating party, and lots of people still add up to one good time.

Up All Night

Students from all over campus got a chance to come together for this year's annual First Look Fair and the All-Niter. The First Look Fair was comprised of student organizations and commun ity businesses showing off their stuff to the campus trying to encourage patronage and involvement in campus activities. Many groups had raffles and prizes, and quite a few lured people in with free goodies. At the All-Niter, held in Stamp Student Union and sponsored bvy GAMMA, members of all student organizations worked together to provide a night full of fun and free of alcohol for their fellow students. Volunteers passed out "mocktails" and set up a University of Maryland version of the MTV show "Singled Out."The First Look Fair and All-Niter were terrific opportunities to see campus groups and meet all kinds of fascinating people and get involved.

Fire Protection

Most students come home from a long day of classes and relax. Some go to work afterwards. But few spend their evenings running in and out of burning buildings. Sound appealing? Then maybe fire protection engineering is the major for you. Many fire protection engineering students work at the College Park fire station across from campus. They are the ones who respond to fire and medical emergencies, as many high rise dwellers know, along with neighbooring stations like Brentwood, Riverdale, Cottage City, and Hyattsville.

There are also students who are not fire protection engineering majors, but volunteer at local stations as firefighters, EMT's, and paramedics. Jeff Alderdice, a sophomore anthropology major, spends his evenings in Cottage City, down Alternative Route 1. He remebers being called to College Park a year ago when a university police officer was in a car accident while chasing a suspect down Route 1. "The suspect died," Alderdice recalls, "but the police officer survived because she was wearing her seatbelt." He has enjoyed the past two years he's spent volunteering. "It's such an incredible experience."

Although some people refer to fire protection engineering as "Burning Stuff 101," students learn valuable tools for designing fire protection equiptment such as standpipes, which are found in high rise buildings and apartments and enable firefighters to hook up hoses even on higher floors. Chemistry of combustable fuels and chemicals prepares firefighters for battling chemical fires and gas spills and leaks. Knowing at what temperature metals will bend and break when there is a fire is a must for firefighters who find themselves in buildings about to collapse. The program provides detailed training in the fire protection sciences, but aspiring fire protection engineering majors will be happy to know that yes, they do burn stuff, too.

Midnight Madness

The 1998 Terrapin Basketball players stepped onto the scene in full force this year at the annual Midnight Madness. Performers of all types, including trick bikers, the Maryland Dance Team, and Cheerleaders. These folks got the crowd pumped up for the Terrapins entrance. Masquerading as the "Men In Black," the basketball team kicked off the season with a dance performance similar to that of Will Smith'. The celebration was a great way to get students, faculty, staff and alumni in the Terrapin basketball spirit.

Expand The Mind

Construction On Campus

Renovation and expansion has been one of UMD's top priorities in recent years. In addition space or sports events and commuters. A new recreation center has up behind La Plata Hall. The new recreation center features state of the art equipment, a basketball gym, and an outdoor olympic size swimming pool. The opening of the poll will be held on may 2,1998. Students on North Hill who have endured the construction racket for three semesters are glad to have the recreation center completed not only for the new facilities but also for some peace and quiet.

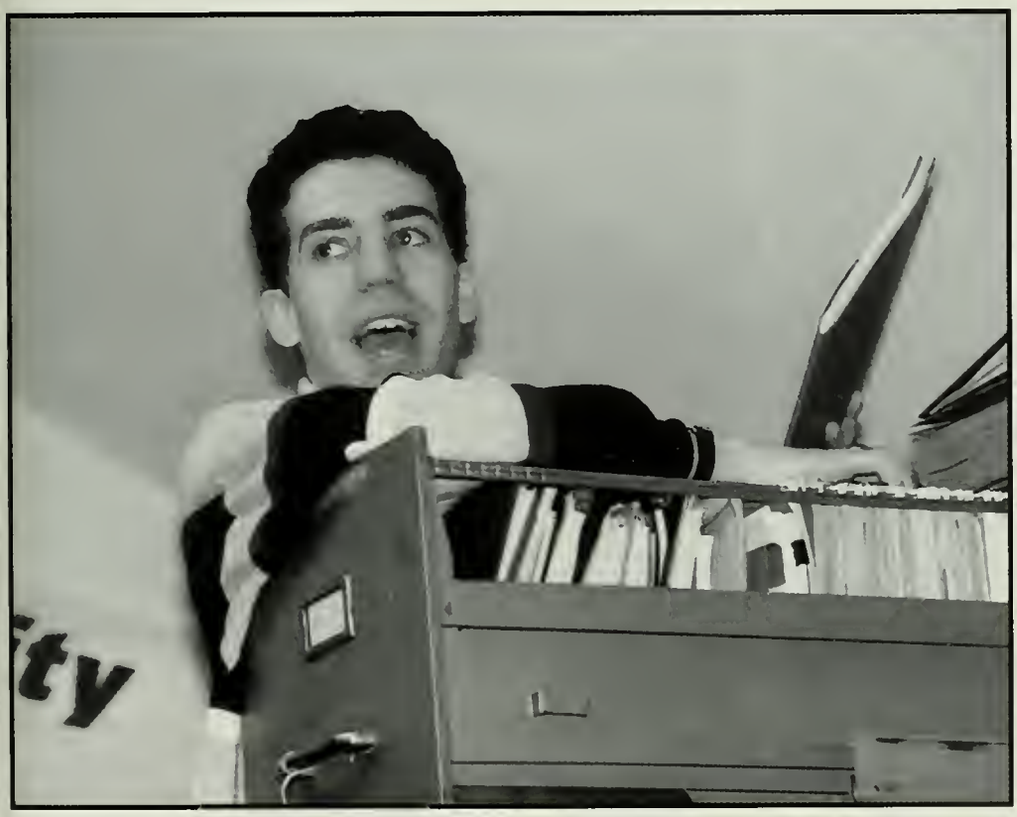
Memories of Maryland

Academics

Easier Said Than Done

" Classes can be tough if you don't keep up. Sometimes it is had to find a balance between academics and fun. A 4.0 is Easier Said Than Done."



College of Agriculture and Natural Resources

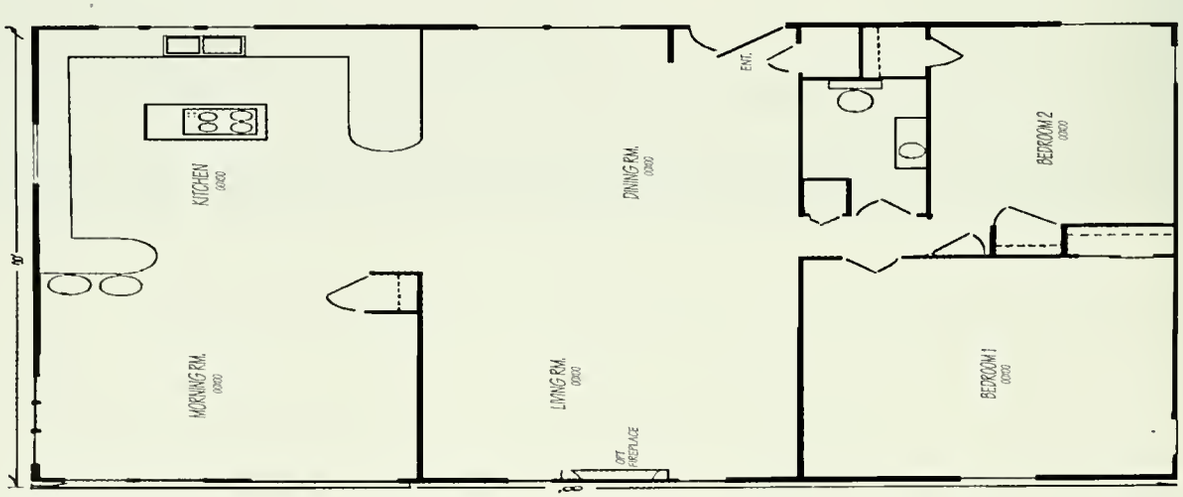
Feeding the hungry of the world, developing sound environmental policies, understanding animal and plant biology and managing agribusiness are all vital concerns of the College of Agriculture and its faculty. Contemporary subjects like genetic engineering, international trade and policy, dietetics, nutrition and landscape architecture have joined the disciplines of crop and animal sciences in the curriculum.

More than 900 undergraduates work closely with faculty in state-of-the-art facilities including new biological resource engineering and animal sciences buildings, a new dairy processing pilot plant, a plant sciences building and an expanded teaching farm. The U.S. Department of Agriculture's National Research Center, the National Institutes of Health and the Patuxent Wildlife Research Center are nearby resources which enhance teaching, research and internship and career opportunities.

College of Architecture

Physics, history, technology, drawing, urban planning and aesthetics all combine to produce the trained architect. At College Park, the School of Architecture is small, select, and well equipped. The Architecture Library is one of the finest in the nation, and the Elizabeth Alley slide collection contains 250,000 slides on architecture, landscape architecture and urban planning. The faculty include well-established practicing architects, preservationists and archaeological experts.

The CADRE Corporations is a nonprofit organization through which students and faculty contact for research and design projects in keeping with the fundamental educational mission of the school. Summer credit programs in historic preservation are located in Cape May, New Jersey, a designated national historic landmark district, and Kiplin Hall in North Yorkshire, England.



College of Arts and Humanities

Critical thought, persuasive speech and good writing - together with abundant opportunities to expand one's cultural and intellectual horizons - these are the foundations of the liberal arts curriculum. The College of Arts and Humanities at Maryland offers students a full and stimulating array of opportunities in the languages, history, philosophy, literature, art and music of the past and present, of the United States and of the world.

Students study with talented faculty members who are redefining their subjects as they teach, pursue scholarship and perform. These faculty are committed to helping students prepare for work in the local community and in the world, and at the same time showing students the way toward building a private self. Faculty often work individually with students to help them become effective, reflective and successful people.

Studying human communities and the way people interact in an effort to solve the most complex problems of our time is the focus of the College of Behavioral and Social Sciences.

The large, diverse college engages its students in the social, political, economic and psychological foundations of civilization. How does individual behavior affect group behavior, and vice versa? What and who is a criminal? What makes a leader? How do we affect change in social behaviors? Unraveling the mysteries of cultures and values and using that knowledge to improve the human condition is the driving force behind this area of study and research.

At Maryland, the proximity of the Census Bureau, the departments of Labor, Health, Education, Welfare and Transportation, and of course the federal government, puts students at the center of information, policy making and planning for our nation's future.

College of Behavioral and Social Sciences

College of Business and Management

The world of business consists of more than profit motives and market shares. Using natural and human resources wisely, cooperating in the international marketplace, understanding competition, the arena of finance and investment, and the dynamics of organizations make this discipline a challenge to young entrepreneurs and aspiring executives.

The College of Business and Management is housed in Van Munching Hall, one of the newest buildings on campus, with sophisticated teaching and presentation facilities. Ranked by U.S. News and World Report among the top 30 business schools in the nation, its majors are among the most popular at the university. In the true spirit of enterprise, the college strives constantly toward "top ten;" its among nine university programs nationwide selected for an IBM Total Quality Management grant to provide training to undergraduates in the TQ management philosophy.

College of Computer, Mathematical and Physical Sciences

Close observation and respect for the empirical method characterize the study of computer, math, and physical sciences. Investigation of the physical phenomena of the universe-and the everyday world-and the mathematical concepts underlying natural law require abstract thinking and the ability to make leaps of reason that connect information in new and revealing ways. This is the realm of symbolic languages and highly refined systems analysis that computer technology has transformed in the last few decades.

CMPS offers advanced technology and facilities in its Automation Research Center, the Computer Vision Laboratory, Astronomy Observatory, Institute for Climate Studies and Human Interaction Laboratory. Faculty are renowned in the areas of human-computer interaction, chaos theory, software development and superconductivity research, among many subjects.

NASA, the National Oceanic and Atmospheric Administration, the Naval Observatory, and the American Center for Physics are located near the campus. Many cooperative teaching and research projects, as well as internship and career opportunities, link the university and these resources.

College of Education

Educating teachers to work effectively with students, to provide a vibrant learning environment of reflection, inquiry and experience, to set a course for adulthood and citizenship is an enormous challenge as we approach the twenty-first century. This is an exciting time to be involved in the most pressing and persistent issues of our democratic way of life, universal education and equality of opportunity.

The University of Maryland at College Park trains more than one-third of Maryland's teachers. It is accredited by the National Council for Accreditation of Teacher Education and the Maryland State Department of Education. Area school systems participating in teacher training are richly diverse, providing the future teacher a broad range of experience with students from every ethnic and economical background.

College of Engineering

One of the best and most competitive engineering programs in the country is centered in the A. James Clark School of Engineering. A close-knit, collegial atmosphere prevails among students and faculty. The noontime picnics and volleyball games, the team-building competitions (which include solar cars, concrete canoes, robots and first-year design projects) and the intense academic challenge combine to produce some of the highest academic achievers, most prestigious awards and the most successful graduates at the university.

The school boasts a small-scale nuclear reactor, subsonic and hypersonic wind tunnels, a flight simulator, and a laboratory for plasma and fusion energy studies. Advanced computing laboratories are open to all students. The school recently received a $15 million endowment to support undergraduate engineering education.

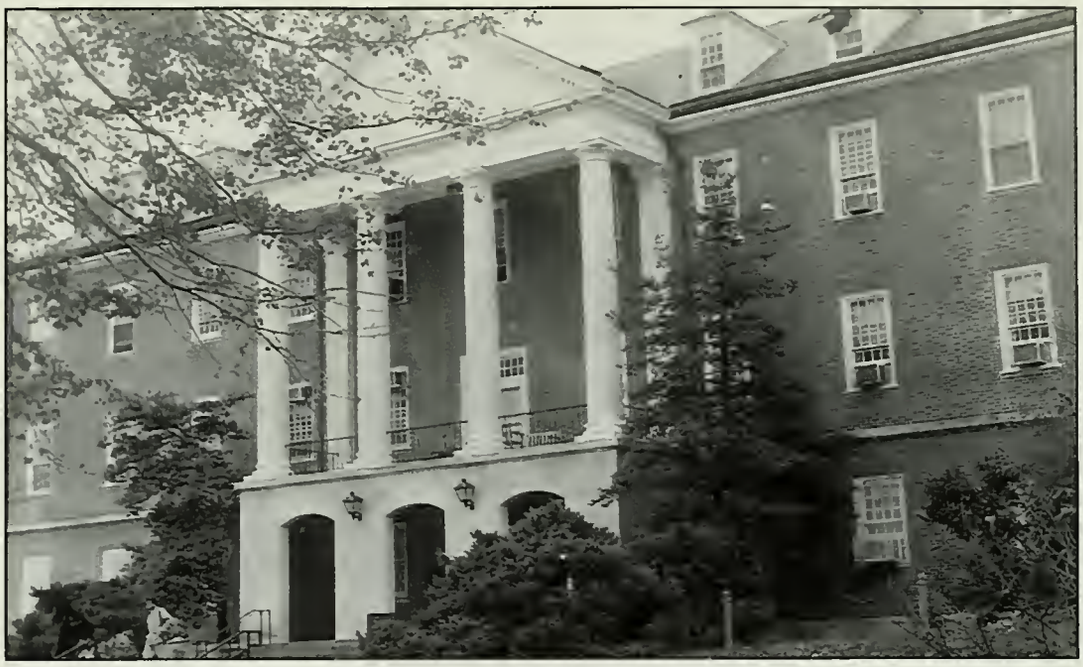
College of Health and Human Performance

For students interested in sports medicine, coaching, health and physical education or family studies, the College of Health and Human Performance offers a challenging academic program coupled with state-of-the-art training facilities and laboratories. Kinesiological sciences -- the study of human movement -- goes beyond the activities normally associated with sport and exercise to the scientific analysis of their effect on and benefit to human physiology.

The area of family and community development prepares students for work in counseling, social agencies or community action programs, through investigation of the dynamics of family and community life, disabilities, violence and economic issues.

The Center on Aging concentrates on the field of gerontology, and includes study of physiology, economics, policy and community education programs for older adults.

College of Journalism



The power and influence of the news media are major factors in modern society. The ability of newspapers, magazines, advertising, TV and radio to shape issues and attitudes makes the study of journalism one of the most responsible and serious career choices of our time. The College of Journalism stands at the doorstep of the nation's capital and the world's news center. Its location makes it the ideal place to study news and public affairs reporting, public relations and mass communication.

Named among the eleven best journalism programs in the nation by Gannett Center for Media Studies, the college offers practical reporting experience at two news bureaus, in Annapolis and Washington D.C., and publishes the *American Journalism Review*, a prestigious national monthly that analyzes print and broadcast performance. An active internship program places students at newspapers and broadcast stations, ad agencies and public relations firms.

College of Life Sciences

From the subcellular level of biochemistry to the study of ecosystems, life scientists are involved in exploring and explaining life processes. The quest for information about viruses, about genetics and heredity, about how the brain works, about the interdependence of plants and animals, including human beings, is essential to the maintenance and survival of life on Earth.

Many students in the life sciences are preparing for careers in medicine, dentistry and other professional fields. The college offers a strong departmental honors program, administers the College Park Scholars in Life Sciences program and provides for on and off-campus research. With access to the National Institutes of Health, the National Museum of Natural History, the National Aquarium and the Patuxent Wildlife Research Center, students are able to expand and apply their knowledge in the field. The Chesapeake Bay, largest of the world's estuarine systems, provides an ideal laboratory for biological and ecological study.

Organizations

No Sooner Said Than Done

" With over three hundred campus organizations this campus offers a wide variety of activities to get involved in. It makes for a more diverse place to learn ."

Omicron Delta Kappa

Omicron Delta Kappa National Leadership Honor Society was founded at Washington and Lee University in 1914. Its purpose was to recognize leadership of exceptional quality in five fields of endevor: Scholarship; Athletics; Campus or Community Service, Social, Religious Activities and Campus Government; Journalism, Speech and the Mass Media; and Creative and Preforming Arts. ODK also worked to inspire others to strive for similar goals; to bring together the most representative students in all phases of collegiate life and create an organization which would help mold the sentiment of the institution; to provide an ongoing relationship for the alumni members of ODK with the University, and to bring together members of the faculty and student body of the institution.

Sigma Circle of Omicron Delta Kappa was founded on campus in 1927 and has initiated over 2,500 students and faculty, as well as many permanent honorary members. This year's honorary initiate was Ms. Patricia Harper Kirwan. Some of the Circle's activities included sponsoring the Annual Awards Banquet, awarding the Sophomore Leader of the Year and Top Ten Freshman, and granting an annual scholarship to an imcoming freshman who was an outstanding high school leader.

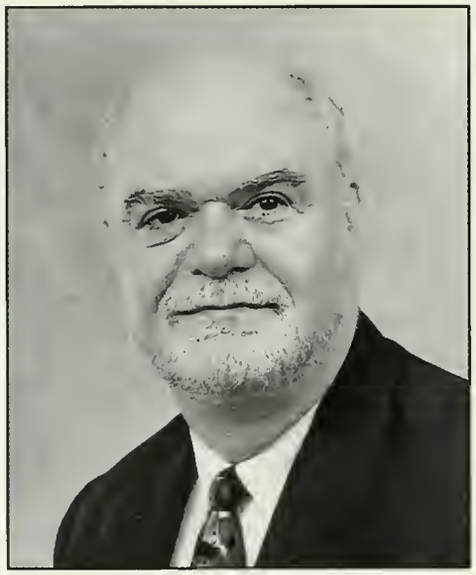
Office of The Vice President For Student Affairs

The Division of Student Affairs holds the responsibility for the coordination and direction of a variety of student development programs. The Vice President's office serves as an advocate for student isssues and concerns within the administration of the campus and the university. The Vice President in conjunction with the departments in the division, promotes the individual development of all student activities, campus-wide events and the addressing of the environmental issues that affect campus life.



Top Left - Dr. Richard Stimpson, Assistant Vice President for Student Affairs. Top Center - Dr. Drury Bagwell, Assistant Vice President for Student Affairs. Top Right - Dr. William L. Thomas, Jr., Vice President for Student Affairs. Bottom Left - Ms. Brooke Lecky, Assistant to the Vice President. Bottom Center - Mr. Warren Kelley, Assistant to the Vice President and Director of Planning and Research.

Judicial Programs

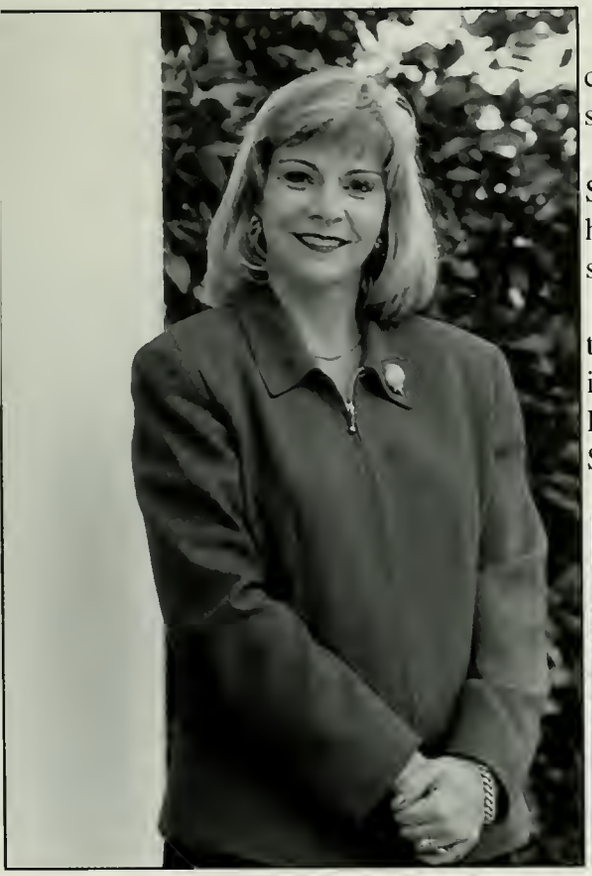
Director: Dr. Gary Pavela

The primary function of the Office of Judicial Programs is to efficiently and equitably resolve disciplinary referrals filed against students. The office staff determines disciplinary charges and interviews and advises all parties involved in disciplinary proceedings. The most serious cases are resolved by student judiciary boards which are comprised of four groups: The Central Judicial Board, the Student Honor Council, Community Advocates, and Student Parking Appeals. Although each group differs slightly in their perspective, they work to educate other students about their rights and responsibilities as members of the campus community.

The Judicial Programs staff trains and advises the student judiciary, reviews all decisions of the judicial boards, maintains student disciplinary records and conducts research and anaylsis regarding student conduct. Through honesty, respect and sensitivity, the Office of Judicial Programs serves to maintain the educational mission of the University by designing policies, conducting programs, and offering instruction that contributes to the intellectual and moral development of the entire student body.

Resident Life

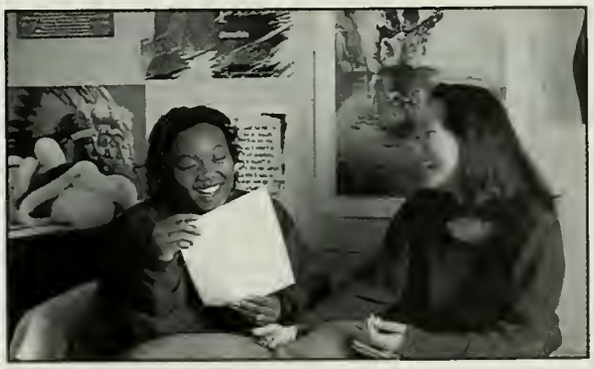
Director: Dr. Parricia Mielke



The Department of Resident Life is responsible for management of 36 campus residence halls as well as for cultural, educational, recreational and social programming activities in the residence halls.

More than 7900 undergraduates lived in residence halls this year. Settings avaliable in residence halls included: high rise traditional residence halls on the north side of campus and kitchenless suites and apartments on the south side of campus.

The Department of Resident Life has gained a national reputation for the many special intrest housing opportunities on campus. Types of special intrest housing included the Language Houuse, Gemstones, International House, Honors House, Smoke Free-Alcohol Free Housing and College Park Scholars.



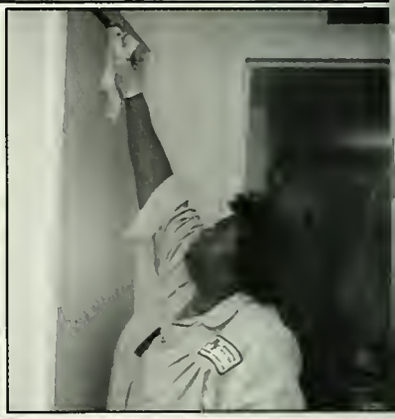
Students relaxing in the dorms.

Residential Facilities

Director: Mr. Jon Dooley

From the Staff of Residential Facilities....
Use wisely what you have learned while here to build a better tomorrow for all people. With best wishes for success and good fortune.

Residential Facilities staff has responsibility for maintainingand renewing our 45 residence halls, the 13 renovated Greek buildings on Fraternity Row, Richie Coliseum and the new Campus Recreation Center. We serve our customers year-round: our 4-WORK Service Center staff (who you call to report problems), Building Services (housekeeping, pest control), Facilities Maintenance sections (e.g., maintenance and carpentry service, plumboing and electric repair, interior painting and more), our student Security Services program (check exterior doors, inspect security lighting, screens ans signs), and our Administrative and Financial Services section (text processing, payroll, budgeting, accounting.



Top Right-Residential Facilities director's office (left to right): Row 1: Melissa Amick, Dwight Ivy, Jon Dooley. Row 2: Sean Ballantine, Steve Kallmyer, Carol Brice. Center Left- Haywood Mobley, painter in the paint shop. Center Right- Mabel Wooten, service worker in our Housekeeping Program. Bottom- Charlie Rice, from our Central Services Program.

University of Maryland Golf Course

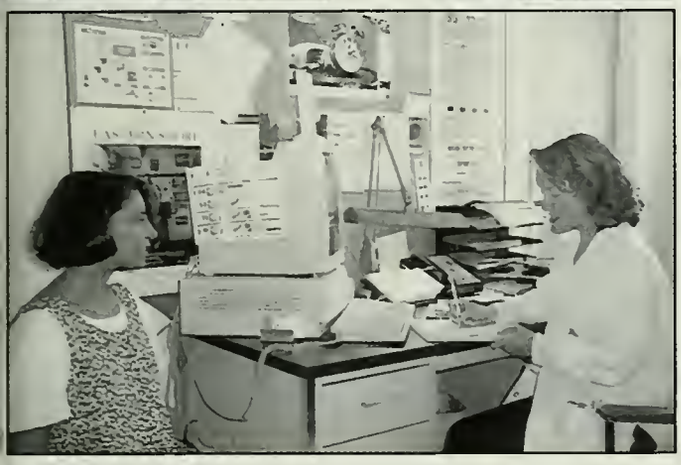
Director: Mr. Jeff Maynor

The University of Maryland golf course is a semi-private 18 hole facility. Designed in 1961 by noted golf course architect George Cobb the course offers challenging tree-lined bermuda grass fairways and rolling bent grass greens. Practice facilities include a lighted driving range and a 7,500 square foot putting green. The course is open to students, faculty, alumni and invited guests on a year round daily green-fees' basis. Golf course memberships are also avalible. The Pro Shop carries a wide variety of Maryland logo merchandise and the LPGA/PGA golf staff offer both private and group lessons.

Top Right (left to right): Daniel McCarthy, Jeff Maynor, Marilyn Kauffman, William Thomas.
Bottom Right: Golf Course

Health Center

Director: Dr. Margaret Bridwell



Top: Assistant Director and Director in a planning session
Bottom: Patient Visit to Health Center Nurse Practitioner

The University Health Center (UHC) is a fully accredited ambulatory health care facility offering a wide variety of servivces for students. The UHC staff is committed to providing the University of Maryland students with quality health care at an affordable price.

The UHC has a large staff with a variety of professional backgrounds and specializations. Comprehensive primary care is provided through various clinics and services. Urgent Care is available Monday through Friday 8:00 am to 10:00 pm and 9:00 am to 5:00 pm on Saturday and Sunday. The Walk In Clinic gives the option of coming to the UHC without an appointment, Monday through Friday from 8:30 to 5:00 pm. You are encouraged to make an appointment whenever possible at 301-314-8184.

The UHC has X-ray and labratory services available with additional charges for these services. The UHC Pharmacy carries a full line of prescription and over-the-counter medications and accepts most prescription plan, cash, checks, Mastercard, Visa, Terrapin Express or you can charge to your student account.

Maintaining a healty campus is more than treating sick students. Preventive care and management of chronic conditions are available in our many specialty services. The UHC places strong emphasis on prevention and health education. A wide variety of topics and programs are offered to both individuals and student groups throughout the campus community by the Health Education Office with peer education and volunteer programs.

All services provided to students are confidential. There is a co-pay of $10.00 for most visits to a provider.

Dining Services

Director: Mrs. Patricia Higgins

Dining Services offers several meal plan options and a variety of services to meet the taste and schedules of the entire campus community. 35 different dining locations are conveniently located in all areas of the campus, and are open hours that fit anyone's schedule. Dining locations include: dining rooms, delis, ethnic eateries, a table service restaurant, two Taco Bell Express locations, the Rossborough Inn, our own bakery shops, the UM Dairy Ice Cream Shop, the traditional fast foods, rotisserie chicken, and three convenience stores. We welcome students, faculty, and staff to our many locations throughout the academic year.

Top: Adele's student servers Herlina Othmann-Revett and Darlene Cobb, display one of the many tasty lunch choices available at the Student Union eatery.
Bottom: Resident Assistants from the Departmenat of Resident Life sample the menu at the annual Dining Services' RA Dinner. This year's theme was "Come to the Caribbean With Me!"

Counseling Center

Director: Dr. Vivian Boyd

Where Seeking Help is a Sign of Strength

As in years past, Maryland students dealing with a variety of personal, social, career, and academic issues found support at the Counseling Center. In individual counseling, students discovered that seeking help is a sign of strength as they explored a range of issues that included self-esteem, stress, relationships, sex, family problems, and making career decisions.

In workshops and group counseling, students met with others who shared similar problems, intrests, and goals. The Conseling Center offered a weekly support groups that addressed a wide variety of topics, such as career exploration, dissertation support, procrastination prevention, and stress management. Group offereings included, "Caught in the Net," a support group for reducing dependency on e-mail and the Internet; "Circle of Sisters," a support group for black women; and "Women,

Food, and Obsession with Thinness," which addressed problems of body image and eating. Consultation, counseling and child testing also were provided to parents, single parents, and their children.

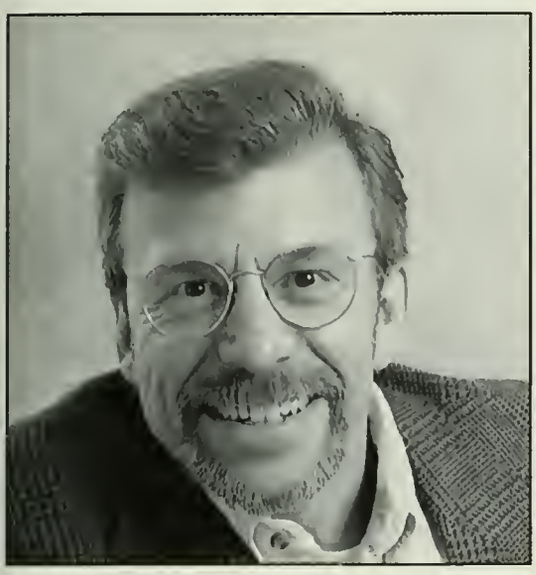
Career counseling also helped students who were choosing a major, establishing career goals, and considering job opportunities. An important aspect of career counseling was understanding how personality, values, and intrests relate to future career satisfaction and success. Students in need of improving their academic skills discovered another valuable resource at the Counseling Center: education specialists who helped them enhance such skills as reading, writing, note-taking, learning science and math material, and learning statistics. Workshop topics included study skills, exam skills, time management, English conversation, end-of-semester survival skills, and completing theses and dissertations. Many students who were back in school after a break in their formal education took advantage of the Counseling Center's Returning Students Program. Workshops and counseling helped these students make the transition to academic life.

The Counseling Center also provided services for students with disabilities, including help in locating interpreters for the deaf or hard-of-hearing students; readers for visually impaired students, blind students, and students with learning disabilities; and assistance with access to various buildings and facilities on campus. In the Counseling Center's Testing Office, students took tests related to the work they were doing in counseling, such as exploring their career intrests. Others took national standardized tests administered by the Testing Office, such as the GRE, LSAT, MCAT, GMAT, and Miller Analogies. Research assistance and individual consultation were provided to students with questions about research design and statistics and writing project proposals, theses, and dissertations.

It was a busy and productive year in the Counseling Center. From individual and family counseling, growth groups, and academic skills workshops, to career intrest testing, disability support, and research assistance, the services provided by the Counseling Center staff reached a wide range of Maryland students in need of professional assistance.

Conference and Visitor Services

Director: Mr. Patrick Perfetto

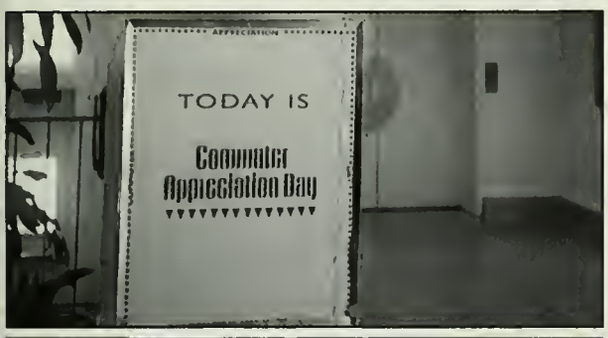


Conference and Visitor Services was the host to the thousands of guests and visitors that came to the University this year. We greeted about 12,000 visitors at the Visitor Center, located in "The Dairy" on Route 1. Fifty percent of our visitors sought admissions information. The Visitor staff ensured that these potential future students had a good first impression of the University. We provided lodging, meals, meeting space and a variety of other services to about 30,000 guests who attended summer conferences, competitions, workshops, and camps. About half of these guests were teens who may someday think of their summer experience at Maryland in deciding where to attend college. Finally, Visitor Services coordinates the Memorial Chapel and the hundreds of weddings that occur there each year. Many of our newlyweds are recent graduates.

Mr. Patrick Perfetto, Director of Conference and Visitor Services

Commuter Affairs and Comunity Service

Director: Dr. Barbra Jacoby



Whether you biked in from an apartment near campus, commuted on Shuttle-UM or relied on your car, getting to campus has no doubt one of your most memorable experiences while at the University of Maryland. Hopefully your memories also extend to the coffee and doughnuts from the weekly "Good Morning, Commuters!" gatherings, a service project you participated in through a club or class, and the Stress-Free Zone at Commuter Appreciation Day.

Each year staff in the Office of Commuter affairs and Community Service works to provide commuter students with the services, programs, and support systems that help them realize goals for a quality education from the University of Maryland:

* Commuter Affairs sponsors programs like S.H.O.W. (Students Helping, Orienting, and Welcoming) to assist students to get more involved in campous life.

* Four time a year University of Maryland commuters receivce a bit of the university in their mailbox when the Commuter Connection, a newspaper with articles related to academic, social, and campus life, arrives in their mailboxes.

* The 40 bus fleet of Shuttle busses and a dedicated staff of over 125 drivers and managers provides commuter, security, paratransit and charter service to the campus.

* With the assistance of trained student staff and computerized listings, students find help in locating a new place to live at the Off-Campus Housing Service in Commuter Affairs.

* Involving students in community service opportunities on campus and in the surrounding communities is the focus of Community Service Programs, the newest within Commuter Affairs.

We hope some of these services and programs offered through the Office of Commuter Affairs and Community Service have contributed to your fond memories of the University of Maryland.

Top: Commuter Appreciation Day
Middle: Barrbra Jacoby, Director
Bottom: "Good Morning Commuters!"

Career Center

Director: Dr. Linda Gast

The Career Center seeks to improve the University's mission and its academic programs by providing a variety of programs and services to meet the diverse career development and employment needs of degree-seeking students. The Center teaches, advises and counsels students to make career decisions about academic majors, work and further education; and collaborates with academic departments, employers, and alumni in the delivery of programs and services.

The Center offers: 1) career information through career counseling, workshops, the Career Center Website (http://www.careercenter.umd.edu), and a Career and Employment Resource Room which assists students in identifying intrests, exploring careers and initiating the job and/or graduate/professional school search process; and 2) employment opportunities through our Student Employment Center, including career fairs, on-campus interviewing, resume referral, on-line access to job listings for full-time, part-time, internship, and cooperative education positions.

Campus Recreation Services

Director: Mr. Jay Gilchrist

In addition to providing their regular variety of recreational activities for the campus community, Campus Recreation Services spent much of the 1996-97 year planning and preparing for new programs and facilities. The anticipated openings of Richie Coliseum in mid-1997 and the Campus Recreation Center at the start of 1998, meant purchasing equiptment, developing new programs, and hiring staff to support the added programs and facilities. The CRS staff, including almost 400 student employees, looks forward to seeing an expanded Fitness Program, a new Outdoor Recreation Program, a new Non-Credit Instruction Program joined with such traditional programs as Intramurals, Sport Clubs, and Informal Recreation in the coming year.

Top: Campus Recreation Services Staff for 1996-97: Front Row (L to R) - Andrea Bussler, Paul Jacobus, Ronald Abbit, Jeff Kearney, Jacob Tingle; Second Row (L to R) - Amy Terhaar, Robin Vollinger, Janet Allesandrini, Debbie Lasick; Third Row (L to R) - Gothard Lane, Ken Meyers, Shawn Flynn, Barbra Aiken, Lawrence Moody, Jim Wenhold; Back Row (L to R) - Dan Barlow, Jeff Kostoff, David Flumbaum, Dan Blackman, Brent Flynn, Jay Gilchrist.

Bottom: College of HHP Grad Students move the ball during the Maryland Student Official's Association administered Regional Qualifier for NIKE National Flag Football Championships. This event is held annually on the CRS Artificial Turf Field.

Stamp Student Union and Campus Programs and University Book Center

Director: Dr. James M. Osteen

Numerous programs and services are provided for the campus community by the Stamp Student Union and Campus Programs. Over 18,000 persons enter the Union each day and take advantage of information services, the Hoff Theater, the Recreation Center, the Art Center and Gallery, and the University Book Center and other retail and food options. This is the site of most major campus programs during the year. In addition, the Office of Campus Programs works with the 350 student organizations, including the Student Government Association, SEE Productions, SUPC, and Greek groups to provide rich involvement and leadership opportunities for students.

Left: Dr. James M. Osteen, Director of the Stamp Student Union and Campus Programs.
Right: Clockwise from left, Allison Gold, Alan Konlande, and Kelly Kish take a break from their duties as Orientation Assistants in the lobby of the Stamp Student Union.

Department of Campus Parking

Director: Mr. David Allen

The Department of Campus Parking (DCP) strives to be responsive to the parking needs of the entire campus community. Annually, this department provides more than 55,000 parking permits to student faculty, staff and visitors; making every effort to distribute parking spaces as fairly and effectively as possible. Through planning, education and enforcement, DCP administers the UMCP Parking Rules and Regulations. Students receive parking information through the Campus Parking Map and Informational Parking Guide, the annual publication Campus Parking News, brochures, fliers, Diamondback and Commuter Connection articles, the Campus Parking homepage on the World-Wide-Web, advertisements and participation in such campus activities as Visit Maryland Day, Spring Open House Information Fairs, Student Affairs Town Meeting, Good Morning Commuters, First Look Fair and Orientation.

Campus Parking has several programs in place to assist students and the entire campus community. At the beginning of the Spring semester, the Meter Debit Card was introduced to the campus community. This card can be used in any of the 1,000 electronic meters on campus and enables you to pay a meter and retrieve unused time. Additional dollar value can be added at the CTS machine in the DCP Lobby. Students are able to register for parking through MARS, by phone or at one of the four KIOSKs locations on campus. Our PITCrew MAV program provides free lockout, flat tire, jump start and gasoline service.

Top: Mr. David Allen, Director
Bottom: Campus Parking Staff

The Panhellenic Association at The University of Maryland, College Park would like to congratulate its Greek women that will be achieving alumnae status this year. Good luck and thank you for continuing your lifetime commitment.

Goes Without Saying

"It goes without saying that we are thankful to all of those who financially contributed to the production of the Terrapin Yearbook."

CAREER MOVES

You may think of Giant simply as a grocery store...but we're much more than that. We are one of the most successful customer-oriented supermarket/pharmacy operations in the nation. If you would like to join such a company, then Giant Food may be for you. Giant's career oriented training program has been one of the reasons Giant is such a strong, well-integrated organization. Giant Food offers entry level positions as Retail Trainees in our Retail Store Management Training Program and Staff Pharmacist positions with the opportunity to advance to Pharmacy Management. In addition, we offer an excellent company paid benefits package.

If you're looking for a challenging career, come see us at Giant!

(Thank you, Primerica.)

Thanks to the efforts of over 100,000 Personal Financial Analysts, Primerica Financial Services has helped to secure the financial future of the next generation. Primerica's customized financial solutions have helped to improve the quality of life for hundreds of thousands of families across North America in the past year alone:

- Providing over 380,000 with a roadmap toward financial independence with the use of a Financial Needs Analysis
- Relieving serious financial problems by consolidating over $1.1 billion in debt
- Helping save for retirement through $2.5 billion in mutual funds
- Protecting Families with over $52.4 billion of life insurance
- Providing affordable property and casualty coverage through 76,000 new auto and home policies

Today, as PFS joins together in St. Louis, families across the country are saying "Thanks for caring about the future of our families"

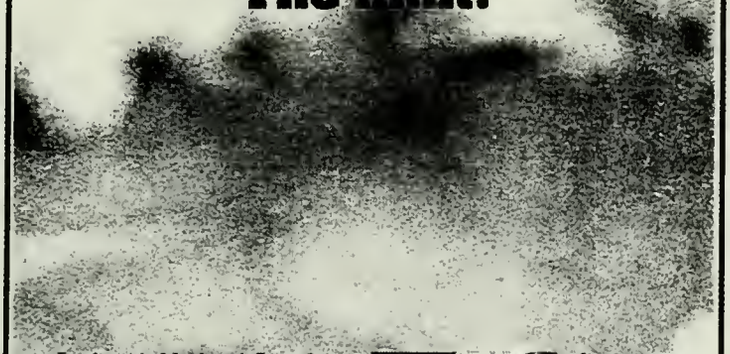
The limit.



In the Air National Guard you'll have every opportunity to become the best. Train in your choice of over 200 technical careers. From telecommunications to computer technology. From meteorology to security. The experience can help your civilian career really take off.

Sights set on college? We'll help you pay for it. With substantial loan repayments and additional assistance from the Montgomery GI Bill. All on top of a great part-time salary and adventure that can take you around the world. It's a pretty good deal for a part-time commitment...as little as two days a month and two weeks a year.

Get your career off the ground. Call 301 981-2820 You'll discover that in the Air Guard, who you are doesn't limit who you can become.

TRW is a global, multidimensional company dedicated to advancing technologies in many diverse industries. A company where individual thinking leads to breakthrough ideas. Where people are encouraged — and empowered — to continuously sharpen their skills and expand their knowledge. Where barriers to creativity have been erased from the rules.

As we move into the next century, we intend to keep accomplishing amazing things by continuing to hire exceptional people. And keeping them stimulated with globally significant projects, working within one of our numerous divisions. Like our Treasury Communications System, Defense Mapping Agency or our Biometric Identification System.

All the while staying focused and pointed toward two goals. Providing excellence. Rising above mediocrity.

If you're a standout talent in the areas of software development, systems and design engineering, network administration or telecommunications engineering, the writing's on the wall. Your future at TRW will be a thrill a minute.

Send your resume to:

EQUAL HOUSING OPPORTUNITY

Welcome to the REAL WORLD

That's what everyone calls life after college, but we keep trying to change the "real" world.

We want to make it better.

We want safer work places. We want justice and dignity on the job for working men and woman. We want fair play in promotions and career advancement.

That's why we're Number One in the Washington metropolitan area when it comes to representing men and woman who work in a wide variety of jobs ranging from supermarket clerks to police officers, nurses to social workers.

We're Local 400 of the United Food & Commercial Worker's, welcoming you to help us change the "real" world, for the better.

COMSAT LABORATORIES

YOUR FRIENDS CALL YOU HYPERACTIVE. YOUR SISTER CALLS YOU TYPE A.

WE CALL YOU MANAGEMENT MATERIAL.

Like you've always said, why put off until tomorrow the eight hundred things you could do right this second? Why indeed. Enterprise Rent-A-Car will spur your brain to work from day one — making critical decisions that impact our bottom-line success. All in an entrepreneurial environment in which compensation is based on performance — not seniority. So join us and we'll expose you to every aspect of business management — from sales and marketing and administration to staff management. And if you thought your degree made you marketable, let's just say you haven't seen anything yet.

Use Your Head. Join Enterprise.

Explore Tomorrow's Technology Today

In a Challenging Career as a Patent Examiner

Immediate Openings for Science and Engineering Graduates

The Patent and Trademark Office determines the patentability of discoveries of inventors throughout the world. This determination is made by approximately 2500 highly trained scientists and engineers.

We invite professionals and future graduates in the following specializations to join our team of dedicated professionals.

Electrical Engineers
- Computer Science/Engineering
- Networks, Image Processing, Speech Processing, VLSI, Artificial Intelligence, Software, Television and Display Technology
- Biotechnology and Organic Chemistry
- Chemical and Material Engineering
- Transportation, Construction and Agriculture
- Power Engineering
- Communications/Information Processing
- Physics, Optics, System Components

YOU HAVE AN IDEA OR TWO,

ABOUT YOUR CAREER.

Explore every one.

What if an international powerhouse fostered a "whole brain" approach to IT consulting, services and engineering? Think of the ideas that could be explored and the advancements that could be made across public and private sectors. . . in enterprise networking, EDI, data fusion, intelligence database design and beyond, especially definitive web-based solutions (site development, applications, electronic commerce, etc.). With your intelligence, it's not difficult to realize that BTG—with an international presence and growing revenues over $400 million—is doing all this and more. We're also hiring. Come explore these ground-floor opportunities:

Internet Development
JAVA • HTML • PERL • WWW • C • C++

Software Engineering
C, C++, JAVA, HTML, ORACLE, PERL, UNIX, Windows NT. (Some positions will require clearances.)

Database Administration
You may qualify with a working knowledge of ORACLE 7.x for Windows NT on Compaq Proliant servers using Compaq SMART Array Controller technology; or HP 9000 series running HP/UX; or DEC Alpha series 8400 running USF-1 compliant DEC UNIX version 3.x. Knowledge of database management systems is a must with experience in PowerBuilder, IEF, etc.

LAN/WAN Administration
You'll maximize your knowledge and proficiency in Windows NT and TCP/IP.

Use Your Creativity
. . . to build your personal benefits. We call it "2020: A Vision of Personal Choice." It's our custom benefits plan that enables you to choose the options that meet your needs best. All this in addition to attractive salaries and brain nourishing challenge. For details, please send your resume to: **BTG, Inc., Dept. UMD9/97, 3877 Fairfax Ridge Road, 1G, Fairfax, VA 22030-7448. FAX: (703) 383-4090.**

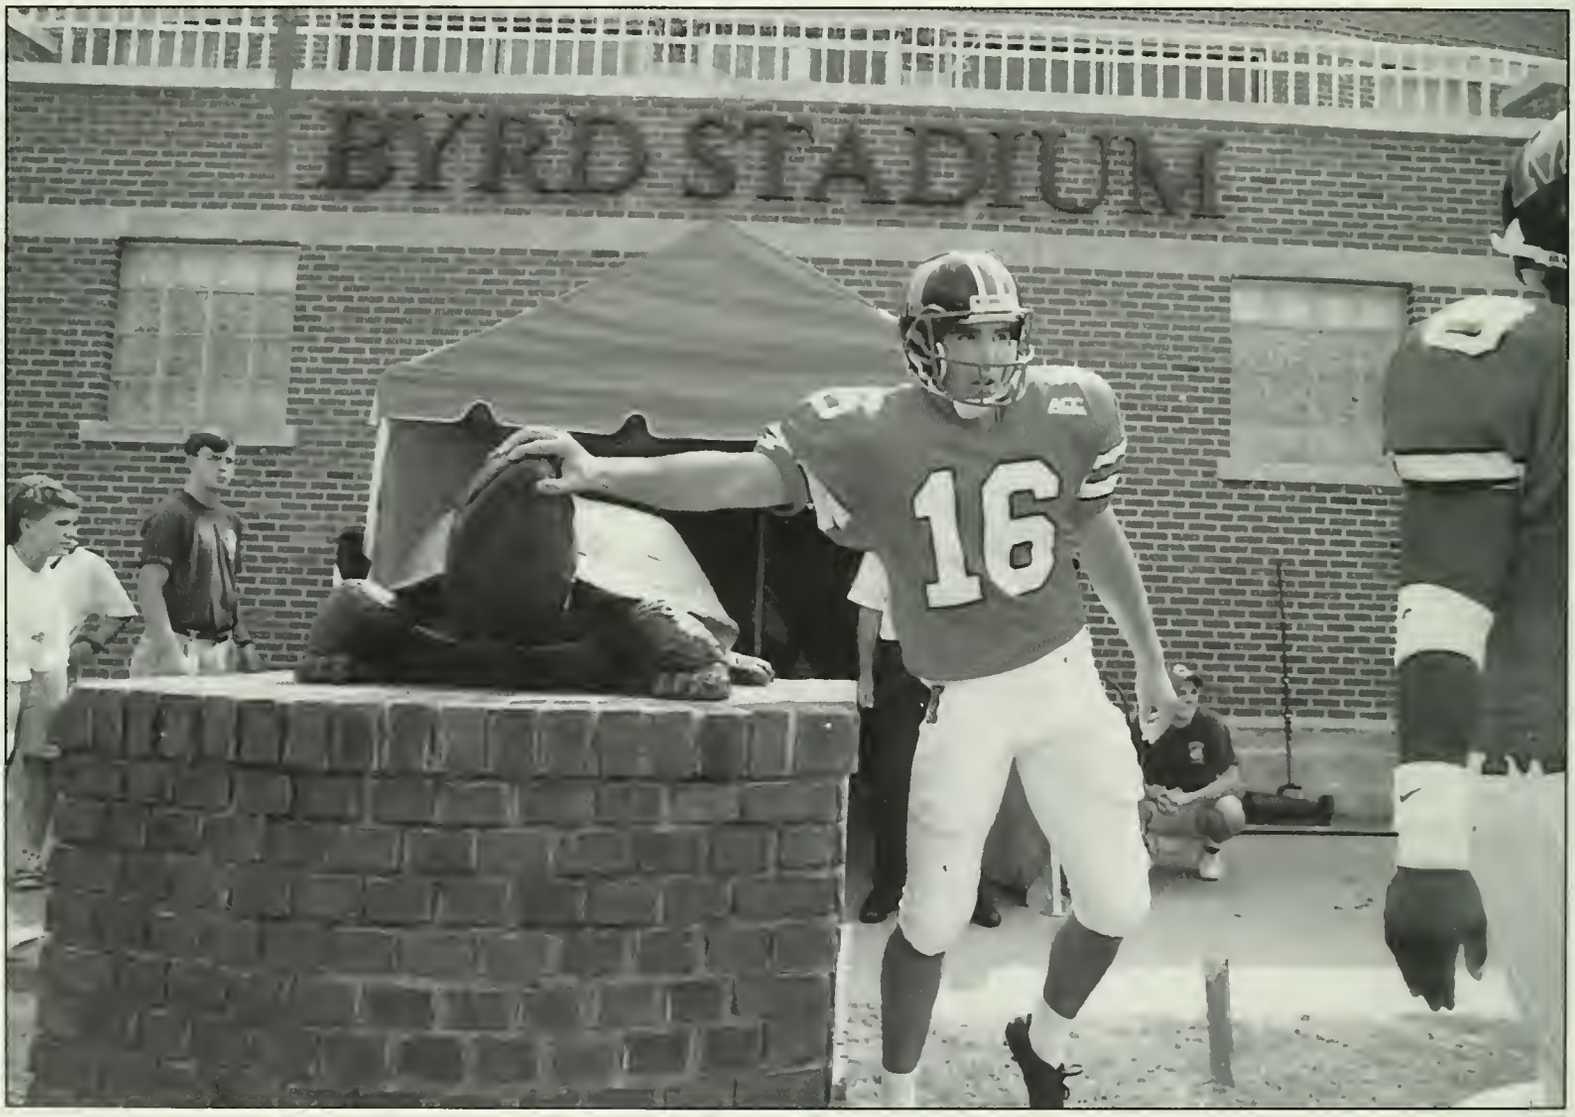
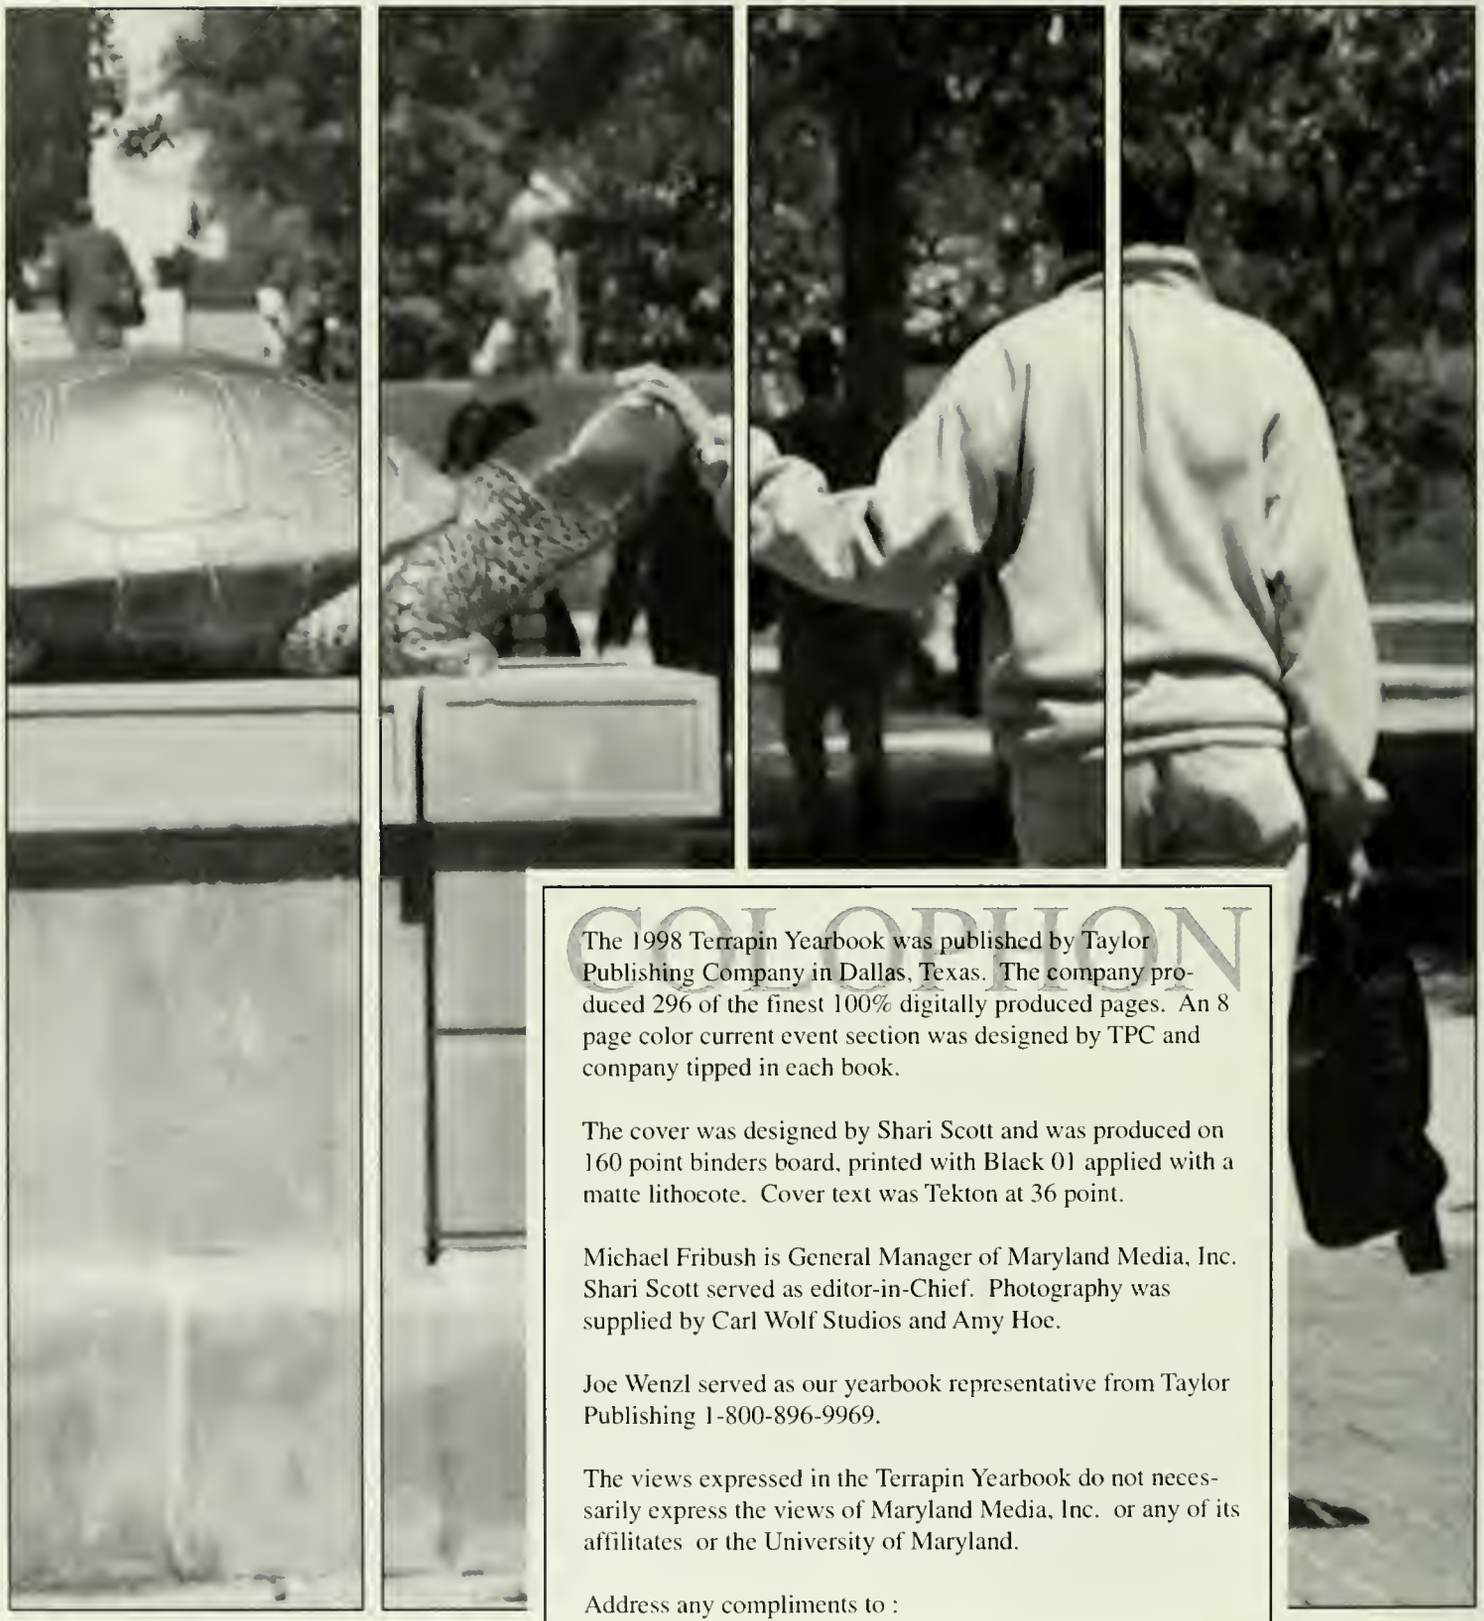
After All Is Said And Done.....



It Has Been A Time To Remember!



COLOPHON

The 1998 Terrapin Yearbook was published by Taylor Publishing Company in Dallas, Texas. The company produced 296 of the finest 100% digitally produced pages. An 8 page color current event section was designed by TPC and company tipped in each book.

The cover was designed by Shari Scott and was produced on 160 point binders board, printed with Black 01 applied with a matte lithocote. Cover text was Tekton at 36 point.

Michael Fribush is General Manager of Maryland Media, Inc. Shari Scott served as editor-in-Chief. Photography was supplied by Carl Wolf Studios and Amy Hoe.

Joe Wenzl served as our yearbook representative from Taylor Publishing 1-800-896-9969.

The views expressed in the Terrapin Yearbook do not necessarily express the views of Maryland Media, Inc. or any of its affilitates or the University of Maryland.
